This report contains selected health statistics that are widely used by the Department of Health, other government

agencies, and the public. This information has proven to be useful in determining trends in health status, for planning health care services and for making decisions about public health programs. It also fulfills diverse requirements in the business community and academic research.

Vital statistics data are compiled and maintained under the direction of the Administrator of the Office of Data, Statistics, and Vital Records (ODSVR). The data is analyzed by staff from the ODSVR. Data from ODSVR can be found in the following sections: Natality, Infant Mortality, Mortality, Induced Abortion, Marriage and Divorce, Health Status Profiles, and Health Status Maps.

Communicable Disease data are collected, compiled, and analyzed within the Office of Disease Prevention. Data on Communicable Diseases can be found in the Communicable Disease
